

# Meeting Minutes - Sprint Retrospective

## To note:

- Finish main features and start implementing additional user features

## Backend team:

What was done last sprint?

- Database structure completed
- Backend connects with frontend to allow login and registration

What will be worked on in this next sprint?

- Implement email verification
- Add encryption to user input

What are the high-risk hurdles for this coming sprint?

- Will evaluate as progression continues.

## Frontend team:

What was done last sprint?

- Webapp structure decided upon
- Experimented with Figma for page design
- Login and registration components completed

What will be worked on in this next sprint?

- Implement email verification
- Continue working on component pages
- Implementing more user features
- Settle on UI and page formats

What are the high-risk hurdles for this coming sprint?

- Figma proved to be more of a liability to workflow than a useful tool, as such the Bootstrap framework will be switched to.
