Meeting Minutes - Sprint Retrospective

To note:
- Implementing the last of the additional web app features and improving front-end design
- Should be good on time after scope re-evaluation

Backend team:

What was done last sprint?
- Email verification implemented
- Main site features finished (product page, checkout, contact, verification, etc.)

What will be worked on in this next sprint?
- Password reset
- Cleaning up code/merging final changes to main

What are the high-risk hurdles for this coming sprint?
- To be mindful of scope creep in implementing the last of the additional features within the allotted schedule

Frontend team:

What was done last sprint?
- Basic site functionality completed (product page, checkout, contact, etc.)

What will be worked on in this next sprint?
- Continue working with back-end team on component pages as they are created
- Update older component pages to match styling of current pages

What are the high-risk hurdles for this coming sprint?
- To be mindful of scope creep in implementing the last of the additional features within the allotted schedule
