Meeting Minutes - Sprint Review

Meeting 1 & 2:

To note:
- Continue working on having project functional on everyone's systems
- Schema developed
- Turning down productivity for midterms
- Begin skeleton mock ups of project

Backend team:

What was done in the last sprint?
- Full Database schema was written
- Project is functional on all members systems

What will be worked on for the next meeting?
- Further develop schema and begin development of tangible database
- Begin testing APIs for project use

What are the hurdles?
- Firebase is still pretty new to the team so picking it up may draw back some time.

Frontend team:

What was done in the last sprint?
- Setup viewable/deployable pages to help structure webapp
- Project functional on all members systems

What will be worked on for the next meeting?
- Continue to develop component pages
- Test out development using Figma

What are the hurdles?
- Figma is also pretty new to the team so picking it up may draw back some time as well.

Meeting 3 & 4:

To note:
- Add more tasks to backlog to stay on track with time
- Prep documents for Sprint 2 deadline on mon
- Good luck on COE758 midterm tomorrow!

Backend team:

What was done since the last meeting?
- Began translating visual DB schema to Firebase

What will be worked on for the next meeting?
- Refine Firebase DB and determine

What are the hurdles?
- Balancing tasks with midterm studying so productivity is not at its highest, will catch up for next segment

Frontend team:

What was done since the last meeting?
- Testing some basic UI on web pages

What will be worked on for the next meeting?
- Test figma features with developing more components in frontend

What are the hurdles?
- Balancing tasks with midterm studying so productivity is not at its highest, will also catch up for next segment

Meeting 5 & 6:

To note:
- Hope everyone found midterms alright
- Prep for sprint docs
- Have sizeable work done on backlog to show in sprint 2 presentation

Backend team:

What was done since the last meeting?
- Optimized Firebase data retrieval process
- Created boilerplate for API creation, which will be useful for future internal API's to be created
- Looked into API creation for customer information retrieval

What will be worked on for the next meeting?
- API for customer information retrieval is expected to be created
- API for other services (such as products, cart, internal tooling, etc.)

What are the hurdles?
- Data retrieval from Firebase was slower than expected, hence the need to develop an optimization, such that less calls would be made to Firebase server

Frontend team:

What was done since the last meeting?
- Initialize Figma team project
- Experiment with Figma UI to draft prototype landing page

What will be worked on for the next meeting?
- Continue to test figma features and how webapp pages will appear to user

What are the hurdles?
- Design layout may vary depending on features we wish to implement and what relevant information must be displayed
