Meeting Minutes - Sprint Retrospective

To note:
- Begin light development for sprint 2 - have some tangible/functional components of the code

Backend team:

What was done last sprint?
- Formed a cohesive vision for the database schema
- Settled on a platform for development (Firebase DB)

What will be worked on in this next sprint?
- Producing database schema according to previous discussion
- Start development using Firebase Platform
- Developing a project base

What are the high-risk hurdles for this coming sprint?
- (Re)familiarizing the team with Firebase platform may take an indiscernible amount of time
- High density of midterms during the sprint may hinder development speed as members split their time between study and development

Frontend team:

What was done last sprint?
- Formed an early vision for the webapp structure
- Settled on a platform for development (Figma)

What will be worked on in this next sprint?
- Developing a project base
- Start developing on Figma
- Starting development on component pages
- Start development of UI alongside the pages

What are the high-risk hurdles for this coming sprint?
- (Re)familiarizing the team with the Figma platform may take an indiscernible amount of time
- High density of midterms during the sprint may hinder development speed as members split their time between study and development
